Cale Geffre

SENIOR SOFTWARE ENGINEER

Seattle, WA · cale.geffre@gmail.com · (612) 655-0132 · linkedin.com/in/calegeffre · github.com/calegeffre

SUMMARY

Senior software engineer with 8+ years delivering production systems at scale across full-stack, distributed backend, and immersive AR/VR platforms. Ships AI-powered features spanning LLM integration, data pipelines, and customer-facing experiences, and has built Treasury systems supporting $370B+ in annual financial operations. Combines end-to-end ownership of UI, APIs, and backend services with team leadership, product focus, collaborative mindset and measurable business impact.

PROFESSIONAL EXPERIENCE

Senior Software Engineer July 2026 – Present

Microsoft · Teams Intelligent Experiences Redmond, WA

- Architecting a new Teams capability that ingests recorded meetings from wearable and handheld devices, parsing and structuring content into outputs that power customer-facing AI experiences.
- Owning backend orchestration for ingestion and attribution workflows across 4 partner teams, driving the system from proof of concept toward production
- Shipped Teams UI for 3D environment customization across Teams Immersive and Environment repos, enabling users and AI workflows to configure scenes directly from the Teams scheduling UI, reducing setup steps by ~75% and enabling agent setup.

Software Engineer 2 Jan 2021 – July 2026

Microsoft · Microsoft Mesh (Immersive Experiences) Redmond, WA

- Led a team of 5 to build MCP servers for Claude and GitHub Copilot plus custom instruction logic for Teams Facilitator, cutting event-customization time by ~85%; won an internal innovation award and secured funding to ship to production.
- Architected React-based authentication across Avatars and Immersive Events with telemetry-driven ring deployment, scaling to 500K+ monthly active users across 1500+ tenants.
- Built bring-your-own-content workflows integrating environments, images, 3D models, and artifacts from OneDrive, SharePoint, and GitHub, unlocking enterprise use cases from factory and construction walkthroughs to persistent team command centers for 50+ customer tenants.
- Owned first-party 3D environment publishing end-to-end, partnering with art and design to standardize Unity scene development, deployment, and validation across web, Windows, and Meta Quest, cutting publish time by ~50%.

Software Engineer Jul 2018 – Jan 2021

Microsoft · Treasury Engineering Redmond, WA

- Built APIs for internal payment and transfer systems processing $1B+ in daily Microsoft banking operations.
- Modernized batch jobs and reporting pipelines supporting 14,000+ trades per year and $170B in asset-management workflows.
- Streamlined enterprise foreign-exchange rate sourcing and distribution across web applications, data lakes, and APIs serving treasury hedging operations as well as powering the most used internal PowerBI report at Microsoft.

Research Assistant & Software Developer Aug 2015 – May 2018

Wisconsin Institute for Discovery Madison, WI

- Developed plugins for Scene software that improved the LiDAR scan-to-3D-point-cloud pipeline.
- Built and presented VR training demos, including a surgical operating room and an accessible street-crossing simulation, to 200+ School of Nursing faculty and students.

PROJECTS

What the Fed · calegeffre.github.io/WhatTheFed

- AI-assisted Federal Reserve analytics dashboard combining economic indicators and prediction-market data to estimate rate decisions and visualize the signals driving them.

PNW Adventure Finder · calegeffre.github.io/AdventureFinderPNW

- Interactive mapping platform built on OpenFreeMap with Open-Meteo and NOAA forecast data to visualize hiking, sun, surf, snow, terrain, and wildfire conditions.

EDUCATION

University of Wisconsin–Madison Sep 2014 – May 2018

B.S. in Computer Engineering & Computer ScienceMadison, WI

Harvard University, Division of Continuing Education Aug 2024 – May 2025

Coursework: Cyberspace and International Security; Applied Circular Economics

TECHNICAL SKILLS

Languages: C#/.NET, TypeScript, JavaScript, Python, SQL
Frameworks & Web: ASP.NET Core, React, Node.js, REST APIs, Unity
AI/ML & Data: LLM application development, Model Context Protocol (MCP), prompt design, retrieval-augmented generation (RAG), ML-assisted analytics, data pipelines, data lakes
Cloud & Infrastructure: Azure, CI/CD, ring-based deployment, GitHub Actions, telemetry & observability
Practices: System & API design, cross-team technical leadership, Agile/Scrum, code review, mentorship
